British Columbia Institute of Technology

Computer Systems Certificate

Burnaby, BC

2021

Computer Systems Technology Diploma

2022

CERTIFICATIONS

AWS Cloud Practitioner Certificate

2022

EXPERIENCE

Backend Developer

Volterra Technologies Inc. | Vancouver, BC

Nov 2022 – Present

- Setup and document necessary cloud software for main MVP and used AWS Lambda to establish connectivity between AWS S3 and InfluxDB for DevOps purposes
- Utilize AWS management console, mainly IAM, S3 and Lambda, to build initial foundation of software application

Freelance Web Developer

Self-employed | Remote

Feb 2020 – Present

- Developed responsive websites compatible across various platforms through the use of JavaScript animations and vanilla CSS
- Managed all stages of website creation for clientele, from initial design and architecture to development and deployment with 100% on-time deliveries
- Delivered several fully-functional products with excellent client satisfaction (example work: GZR, ByteSense)

Application Specialist

WiiBid Solutions | Vancouver, BC

Jul 2021 – Dec 2021

- Wrote testing framework code in Selenium to omit manual testing procedures, reducing QA testing times by up to 50%
- Continuously gathered stakeholder feedback through demos and developed web features accordingly to maintain user satisfaction
- Debugged and fixed WordPress plugin blockers existing on the live deployed server to assist junior developers

Web Developer Intern

Vancouver General Contractors | Vancouver, BC

Nov 2020 – Jan 2021

- Developed modules in Hubspot platform to allow anyone to easily continuously edit and modify websites without web developing knowledge
- Collaborated with UI designers to develop new web pages on the company website to include new features and create an overhaul of existing content

Software Developer Intern

White Mountain Systems Inc. | North Vancouver, BC

Jan 2020 – May 2020

- Developed an essential file handling feature to allow for the uploading of preset games
- Designed and implemented a search function for existing games as a part of the main web app functionality
- Identified and resolved over 10 HTML/CSS and JavaScript bugs in various sprints that were heavily affecting app functionality

PROJECTS

Chat Application

Sep 2021

- Developed React scripts for back-end and front-end to create a multi-user messenger application with live hosting using Heroku and Netlify
- Implemented automatic response for certain user-given phrases and actions to test automatic response features
